3. Why Rough Brothers?

Historically, over 90% of the public conservatories in the United States were built by now-closed Lord & Burnham. Further enhancing Rough Brothers' capabilities, in 1988 Rough Brothers acquired Lord & Burnham's drawings, details and equipment. This is just one more tool that allows Rough Brothers to deliver the precise and pristine detail requirements of conservatory construction, whether new or restoration.

From the United States Botanical Garden in Washington, DC to Huntington Garden's Conservatory in Los Angeles, or anywhere in-between, Rough Brothers has the vast experience and talented personnel to see the most intricate conservatory project through to completion.

Whether your wish is for a new out-of-the-ground conservatory design that is uniquely yours, or a period replication from days gone by, or even a historical restoration of your existing facility, Rough Brothers is anxious to be involved.

At Rough Brothers we have been building and maintaining large, high-quality glazed structures since 1932. We have the experience, resources and technical expertise to solve a variety of conservatory and arboretum design issues. Rough Brothers can restore your structure to its original grandeur or build a new conservatory from the ground up. As part of our design services, we will evaluate your needs, provide you with a detailed analysis of the necessary restorative work or new construction, and help you plan to meet budget and timeline requirements.

Whether historical or period replication or simply updates and renovations, Rough Brothers is able to offer timely and affordable conservatory renovation services.

Whether historical or period replication or simply updates and restorations, Rough Brothers is able to offer timely and affordable conservatory restoration services.

There is no greater element to a greenhouse than the greenhouse glass. Rough Brothers' experienced design team is positioned to help you select the proper glazing material for your glass greenhouse.

Rough Brothers provides design, engineering, manufacturing and construction services for both greenhouses and conservatories.

Utilizing Rough Brothers' conservatories design services will help insure a fully functional and energy efficient conservatory facility.

A well thought out conservatory design by Rough Brothers, starting at the initial conception stage is the best first step to a successful conservatory project that comes in on time and at budget.

In addition to conservatory manufacturing, select Rough Brothers for your conservatory design and installation needs. Maintain single source responsibility.

Rough Brothers offers multiple conservatory glazing systems. Whether new

construction or historic renovation and replication, Rough Brothers has the internal design resources and materials to successfully complete even the most challenging designs.

Rough Brothers is the leader in monumental conservatory design and conservatory manufacturing when it comes to North America's predominate Botanical Gardens. Let Rough Brothers' experienced team design, engineer, manufacture and construct your crystal palace.
