1. Introduction

Designing your greenhouse facility is the energizing part of the process. Bells and whistles, gadgets and devices. Working with a budget and designing your dreams. Thoughts of construction and installation may be intimidating. We understand that; that gives us the drive to install, test, and service each component of each contract with detailed attention. 3. Why Rough Brothers

Rough Brothers' installation crews have a combined 300+ year history of constructing greenhouses. Not just any construction; greenhouse construction. Our crews include second and third generation members, ensuring a job done right. Trained on safety, quality control, and timeliness, we take the trouble out of installation.

4. Page Description

A great greenhouse design and a high quality manufactured greenhouse still needs an experienced Greenhouse Construction team. Rough Brothers is able to provide the project management to tie the design, the manufactured components & integrated systems and the on-site construction into a successful project.

Rough Brothers is the western hemisphere's leading greenhouse manufacturer.

Quality greenhouse manufacturing ultimately allows a low maintenance, energy efficient, long life facilities. Rough Brothers maintains a focus on sustainability through quality design and manufacturing.
